ALLUXITY

Amplifiers

Contemporary Amplification

A New generation of high-end Amplification but with a modern build, functionality, and style, by Alexander Vitus.

Alexander Vitus, son of Hans-Ole Vitus, brings us a compact, version of the beefy high-end amplifiers. But with a minimalistic and modern build, functionality, and style. A new solution of amplification has arrived for the new generation and new lifestyle.

Pre One (Analog)
Pre Two (Analog + Digital + Streaming)
Power One (Stereo, 200W, Balanced Input + Output)
Power Two (Stereo, 200W, Balanced Input)
Mono One (Mono, 250W, Balanced Input + Output)
Integrated One Mk. II (200W)

All models are constructed from the same chassis.

Alluxity offers four standard finish options of White, Charchole gray, Black, and Copper Orange. Custom colors are available and encouraged.

US Distribution Only.

Uniform Compact Design

Electronics

OB.audio

To remain at the cutting edge of technology and with a commitment to sustainable design, our products have been engineered to be upgradable. These updates will be available to current users once new options or enhancements are made available.

Available in two series, the Refence and One series with several AMP, DAC and DPR models available in each series as well as a Reference Mono Amp model.

Made in France

US and Canada Distribution

Streaming Romance

The result: a faithful transcription of the artist's message, rich, detailed and dynamic, with a lively presence that fully restores the emotion of the concert.

Entirely in-house developed.

In order to guarantee the highest quality standards, their production is performed in France by carefully selected local suppliers. The final assembly is carried out by ourselves in our workshop, including all software development.

Loudspeakers

*"Once again, the music and speaker became one,
in texture, timbre, and musical intent."*

-Julie Mullins, Stereophile Magazine

Since 1975, pure handcrafted High Fidelity

Chario's prerogative has always been to put the music in the center, delivering a sound quality as close to a live performance as possible, out of any interpretation, leaving space only to what counts, music and emotions.

Research and development have been the guiding principle on which Chario has been developed. Applying sensory perception and psychoacoustics, Chario's proprietary technology along with natural materials sustained from Italy, Chario ensures quality never falls short of absolute beauty and perfection.

Constellation

Assembled with careful attention to the smallest detail. Each component is designed directly by Chario, according to our meticulous standards. Expertise, technical preparation and high-quality materials guarantee reliability over time.

Chario wants to surprise those who choose her products by combining a classic design with over 40 years of acoustic and psychoacoustic research. Continuing to convey the values that have always distinguished Chario.

Chario's prerogative has always been to put the music in the center, delivering a sound quality as close to a live performance as possible, out of any interpretation, leaving space only to what counts, music and emotions.

Sound Isolation Solutions

Anti-Vibration Soft Suspension System

The best reduction of unwanted resonances and vibration control for large mass loads. Supported additionally by soft suspension, anti-vibration system between top and bottom shelves and ceramic feet mounted under each shelf.

Ceramic Disc Footers

Four ceramic feet under each shelf for the best separation of each shelf and audio component. Vibration control and reduction of unwanted resonances. There are three ceramic balls inside each foot allowing for individual leveling. Made with high-grade and CNC machines parts.

Exclusive, Hand Finished Shelves

- Sandwich construction of precisely CNC Machined 76mm thick top and 25mm bottom shelves
- 480x440x125mm standard size. Custom sizes available upon request up to 2000x600mm
- Available in roughly 100 different matte and high gloss hand finished wood veneers
- Strong and stiff shelving for small and heavy loads

Full Range of Sound Isolation Solutions

Shelving platforms and ceramic feet are available separately from Rack configurations. Several Platforms and footing options are available. Please visit www.Monarch-systems.com/Franc to see the full catalog of available Rack, Platform and footer models and configurations. Heavy-duty cable Stands are also available in a variety of finish options.

All Franc Audio Accessories are available in a range of standard finishes and custom color and wood veneers upon request. Your ability to customize and create the most unique audio displays are endless with Franc!

Superior Cables

Since 1983, our research has driven the development of the finest interconnects, speaker cables and power leads that money can buy. Silver was chosen to achieve this rarefied level of performance, due to its excellent signal transfer characteristics.

Siltech's superior metallurgy and innovative precision construction techniques underpin the exceptional sound of our designs – which now extend to state-of-the-art amplification and loudspeakers. Our emphasis on engineering delivers superlative sound.

US and Canada Distribution

METALLURGY

Siltech is at the forefront of metallurgical science. They lead the audio world in the technical performance and sound quality of conductors.

Classic Legend

Classic Legend offers three different models within the series: 380, 680, and 880. The line includes interconnects, speaker, and power cables. The new G9 silver-gold conductors, the revolutionary 3-layer high-tech insulation together with the improved super silent shielding increase the already superior quality that audiophiles have come to expect from Siltech cables.

All of these innovations result in a superbly resolved sound with a smooth, balanced tonality and exceptional stereo imaging properties. Using technology trickled down from the flagship Crown range, the Classic Legend series outperforms previous Classic cables in technical measurements by 2.5 times. Legends are timeless and these cables are no exception. Investing in these cables will bring you legendary performance for years to come.

ROYAL CROWN

All Royal Crown cables use our new Hexagon construction, previously only seen in Siltech's flagship Royal Triple Crown Power cable. It allows for greater symmetry from every angle and more efficient wire handling for the lowest electromagnetic interference. Siltech's dual-layer insulation of DuPont Kapton and Teflon combined with the Hexagon's air insulation and wide-range shielding results in the lowest inductance and capacitance.

Audio Accesories

Record Clamp

Weighing in at a hefty 985 grams, the TC-40 stabilizes the rotation of your turntable's platter while also damping the platter using a system of high-mass loading. Beautifully precision machined out of a solid billet of stainless steel that's been sandwiched between layers of real carbon fiber, the TC-40 lowers the resonant mechanical playback noise floor of your turntable. This means you'll hear more of the music you cherish while at the same time stabilizing your 'table's inertial platter speed. And since the TC-40 is a weight and not a screw-on clamp, it uses gravity to achieve the same weight on every record instead of the varying pressure associated with a clamp that may not be screwed on with exactly the same torque each time..

Ultra Carbon offers Record Clamps, Sound Isolation Footers and Platforms. Made in Poland. Custom finishes available.

Calibration

AnalogMagik is a turntable cartridge calibration software system that assists in improving turntable cartridge setup and accuracy. Using the AnalogMagik high-quality USB phono sound card and a turntable setup protractor to visually guide you through every step of a turntable and cartridge's alignment. It offers a scientific and repeatable method of calibrating every cartridge setup parameter, including:

- Turntable Speed
- Channel Balance
- Azimuth / Vertical Tracking Angle / Stylus Raking Angle using 1 test track
- Adjusting alignment to account for Zenith Angle imperfections
- Anti-Skating
- Optimizing Phono Stage Loading
- Optimizing Phono Stage Gain Setting
- Vertical Tracking Force
- Measuring Vibrations
- Determining Resonance Frequencies
- AES Wow & Flutter
